Distant Interactive Assessment

CONDUCTING COST EFFICIENT REMOTE RISK ASSESSMENT

Inspired Solutions has developed a distant interactive assessment (DIA) approach for remote evaluation of a facility. It allows the Risk Engineer to conduct an initial risk assessment, verify implementation of risk improvements or support a facility with project implementation on the spot.

Real-time exchange makes the information gathering easy.

The applied video conferencing tool allows access by multiple users at the same time through mobile, tablet or desktop computer with the option to go around a facility and share on the spot images.

The approach is cost efficient and effective by direct verification of actions implemented without the burden of travel - a simple process with a clear agenda.

TECHNOLOGY DRIVEN SOLUTION

- video conferencing
- chat possibilities
- mobile device compatible
- encrypted communication
- passcode access
- fast information gathering
- data sharing possibilities
- clear agenda and process

‘The perception of risk is driven by experience’

REMOTE INFORMATION SHARING

The video conferencing technology allows sharing of information or data through a desktop connection and live images from the site through the mobile connection.

- Confidentiality assured
- Encrypted data exchange
- Passcode protected access
- No data storage
- No photos taken

TECHNOLOGY

Inspired Solutions LLC uses the Jitsi Meet application being a free and open-source multiplatform voice and video conferencing tool for Windows, Linux, macOS, iOS and Android.

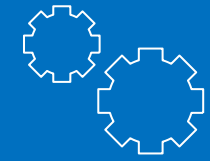

The communication tool works best on a Chrome web-browser or as an App for tablet or phone.

PROCESS STEPS AND AGENDA

The DIA process is initiated through an email by the Risk Engineer with a proposed date and agenda. Instructions on how and when to connect are included.

The first step is to install the Jitsi Meet app on your phone or tablet or to assure that the Chrome Web-browser is available on your desktop. The second step is to connect.

- Make sure your device is charged
- Make sure you have a Wi-Fi or data connection
- The use of headphones is recommended
- Enter the passcode
- Accept the use of microphone and camera
- Share video images when touring the site
- Share documents from the desktop with all parties

RISK ENGINEERING

Inspired Solutions offers hands-on risk engineering services comprising field-oriented services, distant interactive assessment (DIA), plan and project review, risk improvement follow-up and account engineering.

RISK MANAGEMENT

The risk management services of Inspired Solutions include Business Continuity related services such as defining the Strategic Risk Management approach, Business Impact Analysis, Hazard Analysis and Total Risk Profiling.

TRAINING

The training package of Inspired Solutions can be tailored to the needs of an organization and ranges from basic risk engineering activities to detailed risk management support for top management.
